Full Stack Developer with experience working with the **MongoDB, Express, Angular, React, and Node.js** stack. Additionally, I have a background in business administration. I consider myself a creative and communicative person who enjoys working in a team and solving problems. These skills, along with my knowledge and experience, allow me to generate solutions that add value to our clients. Currently, I am seeking to join a remote project where I can work as a Full Stack Developer immediately.

PROFESSIONAL EXPERIENCE

Front-end Developer, Restaurant.pe, Piura, Peru — Sep 2022 - Present
- Develop an ecommerce platform for the restaurants that use the company's system. The web solution will allow restaurant customers to place delivery and pickup orders. This will enable restaurant customers to place their orders easily and directly, allowing restaurants to optimize their logistical processes when it comes to order-taking.
- Develop an Angular library that functions as a chat system connecting to our support area. This library can be used across various products that we offer.
- I implemented and edited modules for an internal control system of the company. In the development area module, I created options to create, view, edit, and delete tasks. Additionally, I created features to manage contacts, notifications, and tagging of collaborators in tasks where they are mentioned.

Technology stack: Javascript , Angular ,TypeScript, Ionic , PrimeNg , Tailwind , Git Lab

Full-Stack Teaching Assistant, Henry Bootcamp, Buenos Aires, Argentina — July 2022 - September 2022
- I coordinated a group of 20 students and achieved integration into the study team.
- I reduced the learning curve by assisting in exercise resolution.
- I proposed ideas for improving Bootcamp processes.

Technology stack: Javascript , React , Express

Project Manager, Piura Conectada — January 2019 - April 2022
- I developed and implemented fundraising strategies. I evaluated and developed projects to improve the quality of life of vulnerable populations.
- We managed to provide lighting to the streets of 120 families, along with water connections and cell phone deliveries for children to continue their virtual classes through the development, organization, and operation of Piura Conectada
